

Common Fund Experiment

Objective

Your goal is to **earn as many points as possible** over the course of this experiment.

How the Interaction Works

- You start each round with **10 points**.
- You will **privately choose** how many points to contribute to a *common fund*.
- You may contribute any amount from **0 to 10 points**.

What Happens Next

1. All contributions are **added together**.
2. The total contribution is **doubled**.
3. This becomes the **common prize**.
4. The prize is **split equally** among all participants.

Your Profits

Your profits = 10 – Your Contribution + Your Share of the Prize

Important Rules

- Your decision is **private** — do not share it with others.
- You will play **5 rounds**.
- Each round is independent, but you may adjust your choices over time.
- Click the provided link **only once**.
- At the end we will show a ranking of total profits.

Good luck!
